SUBJECT INDEX

Acid fast bacilli, Comparative evaluation of Ziehl-Nielsen and fluorescent methods, 6

Acid fast organisms in tissue sections, New and dependable method for demonstration, 45

Advisory Committee, Meeting with Board of Registry, 16, 128

Amylase in blood, Determination, 52

Anaerobes, culture of, New dish for, Single plate method, 31

Anaphylaxis, Dextrose in, 13

Animal board, Improved, 48

Author index, 133

Biopsy tissue, Restoration of dried, 111

Blood amylase, Determinations, 52

Blood, Carbon monoxide, simple and rapid estimation, 79

Blood cell counter, Simple 14

Blood cells, Three dimension vizualization of, by oblique Illumination, 11

Blood chlorides, Mercurimetric determination, 28

Blood culture, Simplified procedure, 70

Blood films and bacterial smears, Permanent preservation by paraffin coating, 50

Blood pipets, Cleaning of, 41

Blood transfusion flask, Milk bottle as, 101

Borowskaja modification of Lange's Reagent for higher altitude, 122

Canadian Society of Laboratory Technologists, 129

Carbon monoxide in blood, Simple and rapid estimation, 79

Cement, Laboratory, 42

Cerebrospinal fluid "pellicles", Examination of, for bacillus of tuberculosis, 113

Chlorides in blood, Mercurimetric determination of, 28

Colorimetric chemistry, Adaptation of, to the photometer, 55

Connective tissue stain, Mallory-Heidenhain's, 35

Culture of anaerobes, new dish for, Single plate method, 31

Desiccation, High vacuum, simple apparatus for, 3

Destaining silver slides, 39

Dextrose in anaphylaxis, 13

Dioxane, Method for dehydration purification and clarification for continued use in tissue technic, 98

Donor bottle, Stand for holding in inverted position, 50

Dried biopsy tissue, Restoration of, 111

Elastica-trichrome stain, Combined, for tissues, 65

Fluorescent methods, Comparative evaluation of Ziehl-Neelsen, and, 6

Fluorescent microscopy, Binocular, 96

Fungi, pathogenic, Routine procedures for the isolation and identification of certain, 123

Hayman-Rose's apparatus for determining sedimentation rate, Modification of, 111

Hemoglobin measurements, Use of a permanent standard for, 1

Hillkowitz, Dr. Philip, resignation from Board of Registry, 17

Hypodermic needle holder, 40

Intestinal parasites, Rapid method for staining of, 2

Kagan falling drop proteinometer, Note on use of, 21

Lange's Reagent, Borowskaja modification, for higher altitude, 122

Melanin, Bodian method applied for demonstration of, 127

Needle holder, hypodermic, 40

Needle tube, point protecting, 42

News and Notices, 16, 75, 128

Occult blood, Phenolphthalin test for detection of, 77

Paraffin coating, Permanent preservation of stained and unstained blood films and bacterial smears by, 50

Paraffin embedding boat, Steel, 40

Parasites, intestinal, Rapid method for staining, 2

Parasitology, Facilities for study of, 128

Phenolphthalin test for detection of occult blood, 77

Photometer, Adaptation of colorimetric Chemistry to, 55

Pipet, rinser, 71

Plasma, Preparation and preservation of, 116

Questions for Registry Examinations, 15, 73, 74
Registry of Medical Technologists of the American Society of Clinical Pathologists, Questions for practical examination held in April 1943, 74
Registry of Medical Technologists of the American Society of Clinical Pathologists, Questions for written examinations held in October, 1942, and in April, 1943, 15, 73
Registry of Medical Technologists, Meeting with Advisory Comittee, 16
Restaining faded tissue sections, 66
Rinser, Pipet, 71
Sedimentation methods, Comparison of Cutler and Westergren methods, 83
Sedimentation rate, Modification of Hayman-Rose's apparatus for determining of, 111
Sedimentation rate, Simple rack and tubes for determining, 29
Sedimentation test, Detection of a common source of error in, 115
Shaker, Mechanical, for transfusion flasks, using standard electric motor, 67
Single plate method of culturing anaerobes, New dish for, 31
Stain, elastica-trichrome, Combined, for tissues, 65
Stain for intestinal parasites, 2
Stain for treponema pallidum, 28
Stain, Mallory-Heidenhain's, Connective tissue, 35
Stain, Wright's blood, Substitute for, 12
Stillman, Dr. Ralph G., appointed to Board of Registry, 17
Subject index, 131
Sulfonamides for safe storage of blood and plasma, 19
Thromboplastin extracts, frozen, Stability of, 26
Treponema pallidum, Stain for, 28
Tubercle bacilli in urine, Simple technic for detection of, 8
Typing and compatibility test for blood donors, Simplified procedure for, 43
Urine, Simple technic for detection of tubercle bacilli in, 8
Urine sugar tubes, Instant cleaning of, 1
Venepuncture dummy, 108
Wright's blood stain, Substitute for, 12
